NEW! Pressure Sensitive
GlitterFlex® ULTRA

Application Instructions

Applies to most clean, dry, hard surfaces, such as metal, wood, windows, glass, ceramic, acrylic, etc. Customize decals for wine bottles, glasses, vases, lamp shades, laptops, cell phones, etc. Not suitable for heat transfer. Do not use outdoors or in direct sunlight - fading will occur.

60° Blade
with increased
downforce

Perform a test cut.
Cut this material
in "right-reading"

Not recommended
for washing

We recommend cutting solid designs. The uneven surface of the glitter makes masking very difficult. If you must use a mask, we recommend using a hotfix transfer tape, HFIX-FLCK. Mask using hard force with a squeegee and slowly peel liner from decal.
